CAREER SUMMARY

I am detail-oriented and a motivated software engineer with 5+ years of experience in IT. Good at fixing and supplying technical help to end-users no matter where they are. Recently, I earned a Professional Certificate in Software Engineering from AUT. I learned how to design and implement software. I want to start a developer career with the good knowledge of end users, mindset to grow, and a steady commitment to learning.

KEY SKILLS

- **Programming Languages:** JavaScript, TypeScript, HTML, CSS
- **Frameworks and Libraries:** React, Next.js, Node.js, Express
- **Database Management:** MongoDB, MySQL, Redis
- **API Development:** RESTful APIs, API Integration
- **Version Control:** Git,
- **Cloud Technologies:** Familiarity with Azure or AWS
- **Technical Support and Troubleshooting:** Diagnosing and resolving technical issues
- **Problem-Solving Skills:** Critical thinking and analytical skills

- Install OS and recover lost data.
- Understand how companies and individuals use their devices and troubleshoot issues accordingly.
- Work independently and as part of a team.
- Learn new technologies and software to stay up-to-date with industry advancements.

HOBBIES & INTERESTS

I've always found technology to be interesting. Whether it is a device or a software program, I feel excited when I see new things as I like to test it out to see how it works. Learning programming has opened me up to many new possibilities for developing and accomplishing things I always wanted to. Going into programming has not only expanded my horizons but also given me the tools to innovate and bring my ideas to life. I would like to work towards a Career in DevOps and or Platform Engineering.
